

## IS THERE A FUTURE FOR YOU IN THE BIO-FUELS INDUSTRY?

BE A PART OF AMERICA'S NEW ENERGY & FUEL FUTURE

### BIO-BUSINESS SUPPORT SERVICES

#### SERVICES TO OPTIMIZE BIO-CROP PRODUCTION & PROFITS:

- 1: Bio-crop establishment & enhancement
- 2: Research, with focus on creating improved varieties of rapid-growth, high-value bio-crops
- 3: Scouting & monitoring
- 4: Pest & disease management
- 5: Science-based management programs for each field, crop & growing season
- 6: Environmental quality & worker safety assurance
- 7: Bio-crop BMPs, including environmentally friendly biomass extraction technologies
- 8: Seed and breeding program start-up and monitoring
- 9: Identification & documentation of other revenue opportunities, including payments for environmental services and carbon sequestering
- 10: Marketing analysis & product usage surveys

#### REFERENCES TO PARTNER COMPANIES – THAT CAN HELP YOU INSTALL FACILITIES & PRODUCE BIO-FUELS AND BIO-ENERGY

- 11: Grant & loan procurement; financing
- 12: Complete turnkey services to establish biorefineries to produce biofuels and bioenergy
- 13: Waste-to-energy system development & establishment, including ... utilization of wastes from landfills, sludge, yard & construction debris; plant-based water collection & treatment systems (phytoremediation); & small-pipe, decentralized waste water systems (these systems are modular, designed best for small flows and are low cost and low maintenance, a perfect compliment for green space management, nutrient removal and cellulosic conversion strategies)
- 14: Alternate and clean technology assessment, evaluation and implementation
- 15: Site selection, planning & design, engineering, construction
- 16: Environmental studies
- 17: Permitting, licensing & regulatory assistance
- 18: Facility monitoring & maintenance
- 19: Transportation, distribution & terminaling
- 20: Transmission system & interconnection planning
- 21: Natural Resource Liability & Asset Management, Net Environmental Benefit Analysis, Renewable Energy Credit sales, use of ecological assets as tradable commodities
- 22: Strategic planning, market definition, economic analysis, performance monitoring
